

The Preverde Pressure Distribution Fabric is a pressure distributing layer for use within the Preverde prefab garden system. The fabric is used as an underlying layer for the Preverde system structure and contributes to an even distribution of loads over the substrate.

The Preverde pressure distributing fabric has the following properties:

- Supplier: Preverde B.V.
- Material: 100% recycled polyester
- Weight: 1000 g/m²
- Overlap: at least 100 mm

Processing: according to current assembly and processing instructions from Preverde.
